Full Visibility - 100% Control

Unique Views

Views and reports for live checks on performance and KPI by site and alerts.

Visibility

Visibility of all devices not just on contract, enabling greater in-sight of all devices. Notifications of newly installed devices providing an alert of non authorised purchases.

Interactive Map

Analyzing data and finding devices is made simple using our graphical dashboards and maps.

Easy Installation

TrueMPS is fast and simple to install, no additional hardware or complex configurations. Once live, TrueMPS quickly finds devices and reports on device type, location, activity, yields giving you a graphical view of the total fleet.

Security

TrueMPS has been independently security tested against DoS attacks and unauthorized access to user and print information. Our software platform reliably, delivers business insight through information and visualization
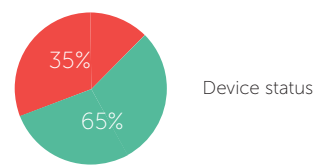

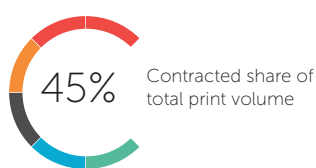

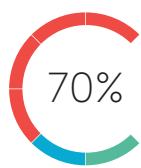

The Difference is Knowledge

TrueMPS provides simple and easy to use dashboards to manage your fleet of devices, available on the market today.

Get instant support whenever, wherever!
Our goal is to provide you with the best support when you need it. In our Self Service Portal, you will find useful information like User Manuals, FAQ, White Papers and Step by Step instructions. If you don't find the answers, just create a Ticket or email us at support@mapsiot.com and we will come back to you!
